

Stronger Suppliers. Stronger Supply Chains. Powered by FOSS IQX

Turn supplier performance into your competitive edge!

Centralize and share data effortlessly

Ensure your supplier data is always correct and up to date by integration with your FOSS instruments quality measurement and centralized gathering of documents.

Keep your suppliers in compliance

Get clear visibility on the status of your suppliers' documents, audits and complaints and get notified when they are about to expire.

Save time on onboarding suppliers

Streamline onboarding of new suppliers with automated communication and supplier portals, getting rid of back-and-forth emailing.

What is FOSS IQX?

FOSS IQX™ is a plug-and-play software solution for food and agriculture operations.

One platform

Avoid silos by managing your devices as well as your suppliers in one solution.

APIs and SSO add-on options

Seamlessly integrate with existing systems for enhanced connectivity and sharing of data.

Easy to use digital tool

A user-friendly interface simplifies monitoring and management.

What Supplier Quality does for you

FOSS IQX™ Supplier Quality helps you keep suppliers compliant, run audits with ease, and continuously monitor quality performance. Get complete visibility into supplier data, speed up issue resolution, and uphold consistent, high standards across your entire supply chain.

FOSS IQX™

Supplier Quality Modules

Modules	Description
Supplier Quality Settings	Configure roles/permissions and notifications across sites; link FOSS instruments to goods received; manage material/service lists and specs for incoming goods.
Supplier Information	Onboard and manage suppliers and sites; keep compliance docs, collect updates via questionnaires, manage contacts and material-to-site links, and track changes and communications in the timeline and log.
Template Management	Create standard questionnaires for specific requirements for your suppliers as well as standardized checklists for goods received.
Goods Receiving	Record every delivery. All documentation in one place for traceability. Apply up to date checklists, attach photos and relevant documentation. Document every measurement Automatic data input from FOSS instruments.
Supplier Complaints	Manage supplier audits from start to finish. Plan, prepare, and perform supplier audits. Trace all documentation linked to audits. Share information and document with the supplier through the supplier portal.
Supplier Audits	Manage supplier audits end-to-end (plan, perform, and trace documentation) and share records with suppliers via the portal.
Supplier Quality Evaluation	Automatically evaluate supplier performance with cross-module KPIs and rank suppliers by score for data-driven decisions.
Supplier Portal	Give suppliers portal access to streamline communication-request/receive documents, share complaints and initiate CAPAs- and log all topic-relevant interactions.
